

Clinically proven to regrow hair

REVITA® Shampoo delivers powerful agents with each wash

The most effective shampoo to help preserve and regrow hair, Revita combines procyanidins, shown to promote hair growth at the hairline as effectively as minoxidil does at the vertex, plus copper peptides to counter aging from ultraviolet rays and environmental toxins, antioxidant molecules to detoxify free radicals, ketoconazole to inhibit fungus, and many other active ingredients. The synergy between these cutting-edge compounds means Revita supports hair restoration with each wash, so you always look and feel your best.

SPECTRAL.RS® Topical therapy reaches deeper via Nanosomes

A breakthrough topical formula, Spectral.RS successfully treats multiple causes of hair loss — stress, poor diet, medications, hormonal disturbance, perifollicular fibrosis — without using minoxidil because it combines Aminexil, adenosine, procyanidins B-2 and C-1, minerals, botanical extracts, and retinol. Like all Spectral products, active compounds come encapsulated via DS Laboratories' next-generation Nanosome technology, which means ingredients penetrate the scalp deeper to deliver more benefits longer. So you get your hair back sooner.

SPECTRAL.DNC® More than minoxidil: Stop pattern balding on the entire scalp

More effective than minoxidil alone, Spectral.DNC treats male pattern hair loss best because it contains multiple active ingredients clinically proven to regrow hair. In addition to research-grade 5% minoxidil to restore the vertex, this topical liquid deploys procyanidins B-2 and C-1 to restore the hairline as well, Aminexil SP94 to strengthen roots, retinol for absorption, and herbal extracts for nutrition and circulation. Encapsulating active compounds within next-generation Nanosomes means deeper penetration for faster results. So you avoid baldness.

SPECTRAL.DNC-L® Maximum formula regrows hair despite advanced alopecia

Indicated for advanced androgenic alopecia, Spectral.DNC-L delivers today's most aggressive treatment to regrow hair because the no-drip cream contains the broadest spectrum of proven compounds. Based on research-grade 5% minoxidil, the formula adds 5-alpha-reductase inhibitors to suppress DHT, antioxidants to neutralize free radicals, Aminexil to strengthen roots, procyanidins to support cells, arginine to boost nitric oxide, botanicals to combat fungus, and more. Nanosomes deposit ingredients deep into your scalp. So hair grows back thicker, faster.
